Weather and chance of precipitation at 600m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Partly cloudy (night)	Sunny intervals	Heavy rain showers	Cloudy	Clear night	Clear night
Precipitation probability					
10%	20%	60%	30%	20%	20%

Forecast for Sunday 20 Nov 2022

Weather: A band of rain will cross Wales overnight clearing east before dawn. During the morning there will be some brighter spells but also scattered showers, during the afternoon the showers will become more frequent and heavy for a time, possibly banding together to give longer spells of rain. Showers tending to die out in the evening.

Chance of cloud-free hill tops above 600m: 40% improving to 90% in the morning, early low cloud associated with band of rain, further low cloud at times around showers will reduce chances to 60%, improving to 90% in the evening.

Low cloud and visibility: Broken cloud layers above 400m are expected in the early morning rain, perhaps more scattered around eastern hills, early visibility will be moderate. Cloud will thin and break during the morning but will not clear completely from the hill tops with periods of scattered cloud around 600m in showers. The best chance of clear tops will be in the east towards Crickhowell but still a few passing showers here with visibility turning moderate for a time. If showers band together in the afternoon cloud may thicken and lower to 400m with poor visibility for a time.

Meteorologist's View

Feeling very chilly overnight in rain and strong westerly winds. Winds may be gusty around showers.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sun 20 Nov 2022	1.8mm	2mm	2.2mm

Forecast for Monday 21 Nov 2022

Weather: Mainly dry and clear overnight but mist and a few fog patches forming. Clouding over from the south around dawn as a band of rain expected to spread across the area first thing. Rain will be heavy at times but turning more showery in the afternoon before clearing north in the evening.

Maximum wind: Southeasterly 35-40 mph with gusts 45-50 mph.

Chance of cloud-free hill tops 600m: 90% decreasing to 40% in the morning as rain spreads over the area, improving to 80% later in the afternoon.

Low cloud and visibility: Tops mainly clear overnight but by dawn cloud will thicken and lower over the hill tops. Broken cloud layers above 400m likely around western hills. Good visibility at first turning moderate or poor during the morning.

Temperature: **Valleys:** Plus 2 rising to 7 Celsius.
At 600m: Plus 2 rising to 6 Celsius.
Freezing level: 1000m rising to 1800m for a time, then falling back to 1000m
